

# Vermi ~ T

**Vermi ~ T** is a probiotic liquid extraction derived from totally organic products. It is a biostimulant made from organic, natural material worked by earthworms with no chemical additives and so is entirely safe for staff, players and wildlife.

## What is Vermi ~ T ?

**Vermi ~ T** contains abundant beneficial micro organisms which are the workhorses of healthy, productive soils and rootzones.

**Vermi ~ T** is rich in humic substances, which condition the soil and improve water retention.

**Vermi ~ T** also contains plant growth factors such as plant hormones and enzymes which stimulate root development.

**Vermi ~ T** contains trace elements

## What will Vermi ~ T do?

Put simply, **Vermi ~ T** is the link between the plant and the soil. It converts nutrients (which would otherwise be locked up in the soil or leached out) into a form available to plants. It also promotes biological activity in the soil, and when applied to turf, it stimulates a biological response which enhances leaf condition and strength.

**Vermi ~ T** can be used in a variety of turf applications: golf greens, fairways and tees; sports pitches; racecourses; cricket grounds and bowling greens.

## Benefits of Vermi ~ T

- **Converts plant nutrients into a form available to plant roots**
- **Improves water retention, increase drought resistance and reduce irrigation costs.**
- **Promotes greater root development and sward density**
- **Aids in suppression of diseases in root zones of turf in conjunction with your cultural control methods**
- **Reduces chemical and fertilizer usage**
- **Increases turf vigour and resistance to wear and stress**
- **Breaks down black layer, thatch and anaerobic conditions and assists in dry patch**
- **Safe — non toxic, reduce liabilities for employees and players**
