## CHAFER GRUB KILLER

- Treats up to 100m<sup>2</sup> (125 sq. yards)
- Store in refrigerator

**Nemasys®**

Simple Pest Solutions  
**CHAFER GRUB KILLER**

This is a natural product that is harmless to children, pets, wildlife and bees. Contains 50 million naturally occurring beneficial nematodes.

- Store in a refrigerator (but do not freeze).
- Read instructions before use.
- Do not leave in direct sunlight.

Use before expiry date shown on pack.

**This pack contains living organisms (nematodes).  
Keep refrigerated (but do not freeze).  
Use before expiry date, printed on the pack.**

**For best results:**

- One application will provide control for chafer grubs already present in the soil.
- Use during August and September, but no later as grubs move out of reach, deeper in the soil.
- Cut grass prior to application.
- Ground must be moist before application.
- It is very important to water treated areas immediately after application or apply during rain, and keep the soil moist for at least 2 weeks.
- Avoid applications in bright sunlight, apply during evenings or dull conditions.
- Use entire packet at one time and do not store made up solution.
- Chafer grubs are killed within two to three weeks.

**HOW TO USE:  
Follow the simple 2-step application**

1. Take one eighth of the pack contents and add to an 8 litre (2 gallon) watering can. Fill the can with clean water and mix thoroughly.
2. Apply immediately, using a coarse rose on the can, to an eighth of the soil area to be treated. Then water again thoroughly using twice the amount of water just used to make sure the nematodes are washed through the grass thatch and into the soil. This pack fills 8 watering cans and treats up to 100m<sup>2</sup> (125 sq. yards).

Now more easily applied with a recommended garden hose applicator - see [www.nemasysinfo.co.uk](http://www.nemasysinfo.co.uk)
